

Lancaster and Morecambe Model Aircraft Club (LAMMAC)

A member's EDF lined up on the well kept LAMMAC runway.

Lancaster and Morecambe Model Aircraft Club (LAMMAC) is a long established BMFA affiliated club situated a short distance from the village of Glasson near Lancaster in Lancashire.

The club enjoys the use of a large open and unobstructed site a few minutes drive away from the M6 motorway, two runways, a pit area and parking area are fastidiously mowed and maintained by club members. The club also features an on site Solar powered charging system for members using electric models.

The club has a very friendly and relaxed atmosphere, safe enjoyment of our hobby is it's primary goal. The site is open from 10 am to 9pm or sunset if sooner.

We currently have circa 43 members and are actively seeking more. The club can provide trial lessons on a club trainer, and tuition from BMFA qualified instructors.

The club promotes the BMFA Achievement scheme and has

qualified examiners available for support and testing.

We host barbecue days, fun flies and a number of other events throughout the year.

The club welcomes fixed wing and rotary wing models, and its membership has a wealth of experience all forms model flying including 3D aerobatics, electric, IC, helicopters, and jets, we also have one of the countries top precision aerobatic pilots as a club member.

If you are looking to learn to fly RC planes or could use our flying site, we would really like to hear from you.

Membership is reasonably priced, and a discount is available for new members holding BMFA Achievement A or B certificates.

If you like to know more, please contact:

Membership Secretary and Instructor Mick Lomax on 07783940934, or Committee Member Stuart Emery on 07921315524.

A Vigen makes a high alpha pass.

Coming in for a low pass along the strip.

Scale, aerobatics, 3D, electric, IC, helicopters and jets are all welcome at LAMMAC.
